

# Fibrinous pericarditis (Photo):

- Photo of adult heart
- The pericardium is covered by reticulated fibrin with coagulated exudate (**bread and butter appearance**).

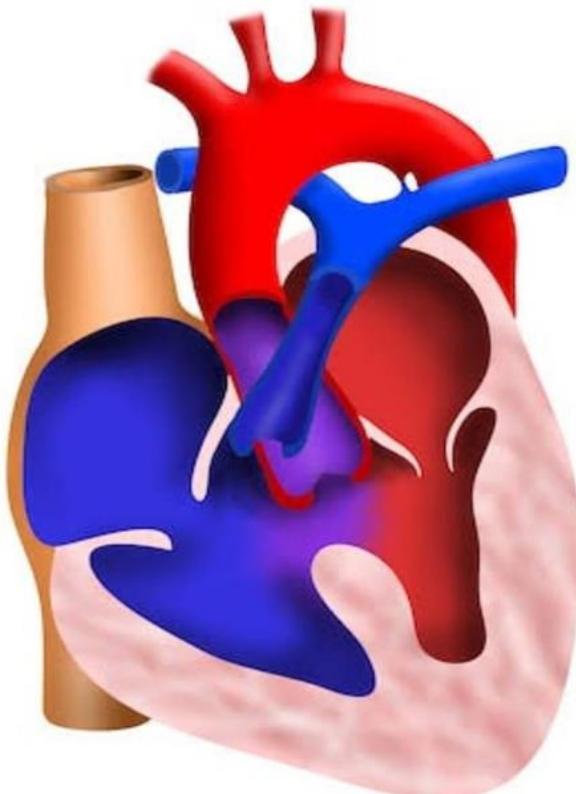

# Acute Rheumatic myocarditis

Myocardium shows  
Aschoff nodules (arrows)

# Fallot's tetralogy:

1. large defect in the membranous part of IV septum
2. Overriding of the aorta (i.e. it originates from both ventricles).
3. Hypertrophy of right ventricle.
4. Pulmonary stenosis.

# Atheroma

- coronary artery  
with atheromatous  
plaque
